

Automated Clinical - Cutting the Red Tape of Prior Authorization in Caring for Patients

How much Time and Money gets wasted in medicine?

Amount of money not being applied to patient care to reconcile payment from the payors is a tragedy.

Medicine needs a rational economic system – not more red tape.

A typical practice faces the following frustrating challenges:

- Peer to peer review
- Medical necessity review
- Preferred formularies
- Medicare audits
- Post payment audits
- DOJ investigations
- Surgery scheduling
- Thousands of medical policies
- Surgery authorizations
- Diagnostic Testing authorizations
- Prescription drug authorization
- Imaging authorizations
- Follow-up scheduling
- “Everything” authorizations

ACG Knowledge Management Point of Care Platform: Solving Physician's Clinical Documentation Headache

ACG Mission: Organize and apply the world's medical knowledge and data

ACG Vision: Do the right thing for the patient and our partners

Our Solution: Automated Clinical Documentation Modules (CDMs)

An Intelligent System designed for and by physicians for Audit Protection, Coding, Medical Necessity, Patient Care Pathways, Prior Authorization, and Risk.

Automated Clinical Guidelines, LLC (ACG) has developed a patented and patent pending technology-based process like no other.

- Our system is designed to help you now and stay ready for tomorrow.
- A system was developed by physicians using a new directed machine learning technology.
 - What used to take months or years for the best software teams to develop now takes minutes to maintain and update the expert system.
 - This makes new knowledge available next business day.
- Reimbursement denials, Pre-authorization run-arounds, Interference with patient care, and endless "Mother May I" requests...disappear. That is our Magic.

“Doing the Right Thing for the Patient”
Goal: Correct Utilization – Not Decreased Utilization

We have created an intelligent store front for all of medicine to stop wasting time and money so we can return to our patients.

ACG organizes the world's medical information making it useful and valuable through a system of intelligent medical algorithms

Physicians and Patients need a level playing field.

- Physicians and patients face an uphill battle for prior authorization.
- We need medical intelligence at the point of care to even the playing field with the payors.
- ACG has built that intelligent expert system and is ready now to deploy.
